COMPASSION IN CHILD CARE

Compassion in childcare means responding to children with understanding, patience and emotional awareness. It involves seeing behaviour as communication of unmet needs rather than misbehaviour and supporting children with calm, respectful guidance. It also includes using simple, validating language, setting clear but kind boundaries and giving children choices to help them feel safe and in control. Compassion extends to families by building trust and approaching conversations without judgment, and to educators themselves by recognizing the importance of self-care and emotional regulation.

Overall, compassion in childcare is a daily practice of staying connected, supportive and thoughtful—especially during challenging moments.
